

Student Billing™ 7.75

Student Billing is Blackbaud's billing management solution for independent, religious, and charter schools. It allows you to assess and collect fees and tuition based on *your* school's policies.

The latest version of Student Billing, 7.75, offers new features and functionality that were developed based on customer feedback and market research. Student Billing 7.75 brings improved integration with **Registrar's Office™**. It also includes usability improvements to statement setup, advance deposits, and the Aged Accounts Receivable Report.

With Student Billing 7.75, you will be able to:

- ◆ Find only student records when searching from charge records
- ◆ Include active and inactive records in the same search
- ◆ View the account balance at the bottom of every tab on a student's record
- ◆ Assign a default payment method to new deposits so all payments are automatically set to that payment method
- ◆ View a Total column on the Preview Records screen when adding transactions to a group of records
- ◆ Set restrictions to facilitate consistent data entry
- ◆ Set a business rule for defaulting payer information onto student records
- ◆ Sort reports by grade
- ◆ Define business rules to configure a balance forward system
- ◆ When recording payments on student records,
 - ❖ Identify a new payer by name instead of creating a new record
 - ❖ Select an established payer from a drop-down list instead of searching for the record

With Student Billing, your school can:

Produce statements based on your school's policies

Streamline your billing process

Save time and money
