- Journal: Tributes and Soft Credits 2

7.25.0 New Features

This guide lists new features available in the **eTapestry** 7.25.0, released on September 18, 2016.

Import: Leading and Trailing Spaces

When you map fields during import, any leading or trailing spaces included in field values on Step 2 of the import wizard will now be excluded. Leading and trailing spaces in field values on this step of the import wizard could cause errors during import where field values in your import file and values on Step 2 did not correctly match up.

Journal: Original Account Column

You can now access the Home page of an original account for a transaction through the Original Account Column on the Journal page. The original account is the household member for a journal item.

In the Original Account column, select the name in the column. The Home page of the original account appears.

Journal: Tributes and Soft Credits

You can now add Tribute and Soft Credit columns to display tribute and soft credited account names on the Journal page.

1 Journal Entry								
+ Add... List View Restore Defaults Clear Search Find in this list Choose columns Filters								
Date	Original Account	Type	Description	Received	Soft Credit Amount	Tribute	Soft Credit	
				\$50.00	\$0.00			
9/7/2016	James Wayne Smith Jr.	Split Transaction	2 Segments Gift - \$25.00 - Annual Fund Gift - \$25.00 - Annual Fund	\$50.00	\$0.00	Margaret Smith Margaret Smith	Smith Family	

To add the Tribute or Soft Credit columns, from the Journal page, click **Choose columns**. The Choose columns to show in the list screen appears. Select or clear **Tribute** or **Soft Credit** to add or remove the columns from the Journal page.

You can also view tribute and soft credit account information for transactions and individual segments in split transactions when a tribute or soft credit has been selected and access the Home page for the tribute or the linked soft credit accounts from the Journal page.

Tribute Transactions

You can use *eTapestry* to track gifts given in tribute of someone. For example, when someone passes away, the family might request that a donation be made to your organization in lieu of flowers. For more information about entering tribute information for a transaction, see [Tributes](#).

After you add the gift or pledge, the transaction information appears on the Journal page of the original and tribute accounts. If you received a gift or pledge in tribute to someone as part of a split transaction (a gift or pledge distributed across more than one purpose), the individual segments of that split transaction appear on the Journal page of the original and tribute accounts.

To view information about the tribute account from the original account, in the Tribute column on the Journal page, select the tribute account name. The Home page of the tribute account appears.

Soft Credit Transactions

Soft credits help you track who gives to your organization and develop relationships with prospective donors. For example, you can use soft credits to credit a donor when their company matches gifts, to credit a solicitor, or to credit a participant in a sponsored event. For more information on adding a soft credit, see [Soft Credits](#).

After you add the soft credit, the credit information appears on the Journal page of the original account and the soft credited account. If you add a soft credit to a split transaction (a gift or pledge distributed across more than one purpose), the individual segments of that split transaction appear on the Journal page of the original account and the account linked to the soft credit.

To view information about the soft credited account from the original account, in the Soft Credit column on the Journal page, select the soft credit account name. The Home page of the soft credited account appears.
