

The following pages are the minimum system requirements Blackbaud suggests for each of the **Blackbaud Online Admissions 2.0** components. For a more in-depth technical configuration of **Blackbaud NetCommunity**, read the Blackbaud NetCommunity Configuration Overview, located under Support, User Guides on our website. Please contact your Blackbaud account manager if you do not have access to this information.

Unless noted below, all other **Blackbaud NetCommunity 6.10** and **Blackbaud Online Campus Community 3.11** system requirements apply to **Blackbaud Online Admissions 2.0**.

Note: System Requirements are subject to change. Before making any purchase or installation decisions, ensure you have the latest System Requirements and check for third-party compatibility information in Knowledgebase. If you use multiple Blackbaud products, refer to the System Requirements for each product; the total recommendations may be different from what is listed below.

Blackbaud Online Admissions

Blackbaud NetCommunity database server	
general	<p>If you install the Blackbaud NetCommunity database on its own database server, then please refer to the Blackbaud NetCommunity 6.10 system requirements for the database server.</p> <p>If you install the Blackbaud NetCommunity database on the same database server as The Raiser's Edge, The Education Edge, or Blackbaud Student Information System, then please review the system requirements for each of those versions and review your configuration with a Blackbaud representative.</p>

Blackbaud NetCommunity web server	
disk space	Minimum of 25 MB available space for the installation.

Blackbaud Software Compatibility

Blackbaud software requirements	
Blackbaud Online Campus Community™	<p>Blackbaud Online Admissions 2.0 is compatible with Blackbaud Online Campus Community 3.11 patch 2 or greater. Please refer to the Blackbaud Online Campus Community 3.11 system recommendations.</p> <p>Blackbaud Online Admissions 2.0 is not compatible with the SQL Server 2005 Express versions of The Education Edge.</p>
The Education Edge™	<p>Blackbaud Online Admissions 2.0 is compatible with The Education Edge 7.80 or higher with Admissions Office installed. Please refer to The Education Edge system recommendations.</p> <p>Registrar's Office is optional unless the organization wants to include Residence Life fields such as Roommate Requests and Residence Hall Requests.</p> <p>Blackbaud Online Admissions 2.0 is not compatible with the SQL Server 2005 Express versions of The Education Edge.</p>
Blackbaud Student Information System™	<p>Blackbaud Online Admissions 2.0 is compatible with Blackbaud Student Information System 7.80 or higher with Admissions Office installed. Please refer to the Blackbaud Student Information System system recommendations.</p> <p>Registrar's Office is optional unless the organization wants to include Residence Life fields such as Roommate Requests and Residence Hall Requests.</p> <p>Blackbaud Online Admissions 2.0 is not compatible with the SQL Server 2005 Express versions of Blackbaud Student Information System.</p>
Blackbaud NetCommunity™	<p>Blackbaud Online Admissions 2.0 is compatible with Blackbaud NetCommunity 6.10 patch 4 or greater. Blackbaud Online Admissions does not support the UK version of Blackbaud NetCommunity. Please review the Blackbaud NetCommunity 6.10 system requirements.</p>

Recommendation Disclaimer

System recommendations are based on information available on the last updated date. They are published only as a guide and relate solely to Blackbaud software.

Performance and response time are affected by many factors related to hardware (such as RAM, processor speed, and hard disk subsystem performance), network configuration (such as NIC performance, cable type, topology, operating system, parameters, and traffic), and the database (such as size, number of concurrent users, and the type of activities each user is performing). In addition, network and workstation operating systems, third-party software products, and our own products are continuously updated with new features and options, which often place greater demands on hardware.

Blackbaud recommends the purchase of top-of-the-line equipment when possible and that organizations budget for continual upgrades to their system.

Blackbaud staff may provide limited informal guidance based on information made available. However, neither these system recommendations nor our staff's guidance constitute a guarantee of compatibility, outcome, or performance. We encourage organizations to consult their own systems staff or outside technical experts to ensure appropriate results. Comprehensive technical consulting services are available through Blackbaud. Under a separate consulting arrangement, our consultants evaluate the installation of all Blackbaud Admissions and recommend optimal hardware and system configuration options. Email solutions@blackbaud.com for more information.
