

The following pages are the minimum system requirements Blackbaud suggests for each of the **Blackbaud Online Campus Community 3.11** components. For a more in-depth technical configuration of **Blackbaud NetCommunity**, read the Blackbaud NetCommunity Configuration Overview, located under Support, User Guides on our website. Please contact your Blackbaud account manager if you do not have access to this information.

Unless noted below, all other **Blackbaud NetCommunity 6.10** system requirements apply to **Blackbaud Online Campus Community 3.11**.

Note: System Requirements are subject to change. Before making any purchase or installation decisions, ensure you have the latest System Requirements and check for third-party compatibility information in Knowledgebase. If you use multiple Blackbaud products, refer to the System Requirements for each product; the total recommendations may be different from what is listed below.

Blackbaud Online Campus Community

Blackbaud NetCommunity database server

general	<p>If you choose to install the Blackbaud NetCommunity database on its own database server, then please refer to the Blackbaud NetCommunity 6.10 system requirements for the database server system requirements.</p> <p>If you choose to install the Blackbaud NetCommunity database on the same database server as The Raiser's Edge, The Education Edge, or Blackbaud Student Information System then please review the system requirements for each of those versions, and review your configuration with a Blackbaud representative.</p>
---------	---

Blackbaud NetCommunity web server

general	<p>Blackbaud Online Campus Community, as it relates to the NetConnection add-on with Blackbaud NetCommunity, requires its own web server. Please refer to the Blackbaud NetCommunity system requirements for the web server system requirements.</p> <p>Note: Due to requirements of The Education Edge and Blackbaud Student Information System, the Blackbaud Online Campus Community must be installed on a separate web server from NetClassroom and or Faculty Access for the Web.</p>
disk space	Minimum of 25 MB available space for the installation.

Blackbaud Software Compatibility

Blackbaud software requirements

The Education Edge™	<p>Blackbaud Online Campus Community 3.11 requires and is compatible with The Education Edge 7.80 or higher. Please refer to The Education Edge system recommendations.</p> <p>Blackbaud Online Campus Community 3.11 is not compatible with the SQL Server 2005 Express versions of The Education Edge.</p>
Blackbaud Student Information System™	<p>Blackbaud Online Campus Community 3.11 requires and is compatible with Blackbaud Student Information System 7.80 or higher. Please refer to Blackbaud Student Information System system recommendations.</p> <p>Blackbaud Online Campus Community 3.11 is not compatible with the SQL Server 2005 Express versions of Blackbaud Student Information System.</p>
NetClassroom	Blackbaud Online Campus Community is compatible with NetClassroom 7.80 or higher. Please refer to The Education Edge system recommendations.
Faculty Access for the Web	Blackbaud Online Campus Community is compatible with Faculty Access for the Web 7.80 or higher. Please refer to The Education Edge system recommendations.

Blackbaud NetCommunity™	Blackbaud Online Campus Community 3.11 requires and is compatible with Blackbaud NetCommunity 6.10 patch 2 or higher. Blackbaud Online Campus Community does not support the UK version of Blackbaud NetCommunity . Please review the Blackbaud NetCommunity 6.10 system requirements.
The Raiser's Edge™	Blackbaud Online Campus Community requires The Raiser's Edge 7.91 or higher. Please refer to the Blackbaud NetCommunity system requirements for The Raiser's Edge module requirements.

Recommendation Disclaimer

System recommendations are based on information available on the last updated date. They are published only as a guide and relate solely to Blackbaud software.

Performance and response times are affected by many factors related to hardware (such as RAM, processor speed, and hard disk subsystem performance), network configuration (such as NIC performance, cable type, topology, operating system, parameters, and traffic), and the database (such as size, number of concurrent users, and the type of activities each user is performing). In addition, network and workstation operating systems, third-party software products, and our own products are continuously updated with new features and options, which often place greater demands on hardware.

Blackbaud recommends the purchase of top-of-the-line equipment when possible and that organizations budget for continual upgrades to their system.

Blackbaud staff may provide limited informal guidance based on information made available. However, neither these system recommendations nor our staff's guidance constitute a guarantee of compatibility, outcome, or performance. We encourage organizations to consult their own systems staff or outside technical experts to ensure appropriate results. Comprehensive technical consulting services are available through Blackbaud. Under a separate consulting arrangement, our consultants evaluate the installation of all Blackbaud applications and recommend optimal hardware and system configuration options. Email solutions@blackbaud.com for more information.
