Miami Country Day School is a college preparatory learning community committed to educating the whole child. As a K–12 private school located in Miami, Florida, Miami Country Day School prepares children for college and for life by embracing core values of honor, respect, wisdom, and compassion.

Miami Country Day School moves from Education Edge to Blackbaud’s “ON” products to connect its entire school community.

Staff and faculty members at Miami Country Day School knew they had maxed out the features and functionality in their previous school administration software, Education Edge, and needed to invest in a new solution to meet the demands of their school community. They wanted an improved admissions experience, an intuitive grading experience, and a responsive website. Plus, parents and students needed to be able to access learning resources at any time, from anywhere.

Miami Country Day School chose Blackbaud’s “ON” products—including onBoard for enrollment management, onMessage for content management, onCampus for learning management, and onRecord for student information management—to meet the demands of faculty members, teachers, parents, board members, and students and to connect the entire school.

“Blackbaud’s “ON” products are now the single source of information for our school community, and it has made a world of difference.”

—Gregg Lightfoot, PhD, Teacher

Miami Country Day School is powered by:

- onBoard®
- onMessage®
- onCampus®
- onRecord®
- Raiser’s Edge NXT™
- Financial Edge™
- Smart Tuition™

An Intuitive Interface Makes for Easy Adoption

Making the transition to a new solution can be frustrating, especially with veteran faculty members who may be more resistant to change. With a user-friendly, intuitive interface, the “ON” products smoothed the move for Miami Country Day School.

“I’m so proud of our faculty members who embraced Blackbaud’s “ON” products the way they did,” Director of Upper School Glen Turf said. “I saw them try new things that I have never seen them try before.”

The “ON” products also make it easy for parents to access information they need. Julie Pronesti, a parent and board member, loves being able to look up her son’s information right from her phone. “I know on a daily basis how my son is doing or if he has a quiz. I can look up what I want, find it, and I’m done,” Julie explained. “It makes the parent experience so much better.”

Making a Good First Impression

The admissions office also felt positive about moving to the “ON” products. The new online experience makes a positive first impression for the school, which is critical to attracting more students. Ingrid Palmisano, director of admissions and financial aid, describes it as “the welcome mat” for interested families.

With the “ON” products, Ingrid believes prospective families can get a better sense of the school community through the website. It helps them envision themselves as part of the school. “Blackbaud’s “ON” products are a red-carpet experience for families,” she said.

“Blackbaud’s “ON” products just work. They work for my students. They work for my faculty, my parents...and they work for me.”

—Jimmy Cudzilo, Director of Data and Web Services

A Positive Transformation

More important than all the features and functionality in “ON” products is the fact that everything is together in one place. Gregg Lightfoot, a teacher at the school, explained, “It’s under one roof, which makes all of the moving pieces in a teacher’s day that much easier.”

Having a single source of information for the school community has empowered Miami Country Day School to revolutionize and evolve its teaching and learning experience. Parents are more connected to what their students are doing in the classrooms each day. Admissions staff members are able to impress prospective families and board members. Teachers are able to spend less time on disparate technology systems and more time attending to their students’ needs.

“I’m really glad we unified our systems under one umbrella,” Gregg said. “It has made it a lot easier for all of us to focus on what’s most important, which is how we can benefit students by enhancing the learning experience.”
