

Your whole school is now connected.

We're redefining the way private schools interact online.

onBoard® Enrollment Management System

onBoard makes it easier than ever to connect all aspects of your admissions process by helping your admissions team and prospective families manage and track their progress from inquiry and application through acceptance and enrollment. Key features include:

Real-time inquiry alerts • Financial aid award tracking • Daily dashboards • Online applications

onMessage® Content Management System

onMessage gives you the control to build and edit your school's web pages with easy access to content types including photos, videos, downloads, text, and more. Share material and access content contributed by your entire school community. Key features include:

Unique web design • HTML emails • Site management • e-Commerce • Landing pages • Device friendly

onCampus® Learning Management System

onCampus makes it possible to manage, connect, and share information with students, parents, and your whole school community. Developed with direct input from our customers, onCampus gives teachers the easy tools they need to meet the demands of a modern private school. Key features include:

Create, score, and record • Interactive assignments • Bulletin boards • Open grade book • Topics

onRecord® Student Information System

onRecord let's your school community manage schedules, transcripts, and GPAs. It works directly with onCampus and simplifies how you share student data and academic records securely. Key features include:

Attendance information • Academic profiles • Conduct reports • Grading reports • Learning profiles • Official notes

SMART TUITION™ Billing and Payment System

Smart Tuition simplifies the billing of tuition and fees and the processing of payments to meet the needs of any school, regardless of size or complexity. Student and family accounts with full billing detail are presented online with access from onBoard and onRecord. Key features include:

Tuition management • Payment plans • Invoice presentment • Payment choices • Late payer follow up service

“What was most appealing to me as we looked at the new products and considered making the switch was the product's ease of use. It was much cleaner and very intuitive.”

— Curt Lewellyn,
Innovation Lab Director,
The Fessenden School

Core “ON” Features

All Blackbaud “ON” solutions come with an extensive list of core features built right in. Whether your school uses one or all of our “ON” products, these features make the difference.

- **Directory:** Secure employee, parent, and student access.
- **Notifications:** Relationship-specific messaging.
- **Calendar:** Filterable master calendar that displays public and private events
- **Content feeds:** Users subscribe to school-defined RSS and iCal feeds.
- **Media gallery:** Aggregate media from various locations on the site.
- **List generation:** Perform filterable custom queries.
- **Authentication:** Utilize one username and password across all products.
- **User management:** Maintain contact, biographical, and access information.
- **Unlimited users:** Add unlimited number of alumni, students, and parents
- **Recent activity:** Personalized/relevant content from across campus life.
- **Message inbox:** Internal messaging system for students, parents, faculty, and alumni.
- **Native search:** Search public and user-accessible private content.
- **Device friendly:** Products display natively on phones, tablets, and desktops.
- **School forms:** Permission, emergency contact, blank, and profile update forms.

“We were coming from a multi-system environment that had no integration between the various databases. The “ON” products replaced most of these systems and gave us the integration we were looking for. We didn’t find this sort of inherent integration available from any other vendor in the K–12 space.”

—Greg Baschuk,
Director of Information
Technology,
St. Mildred’s–Lightbourn
School

As with all our “ON” products, Blackbaud’s NXT solution line of technology and accounting software for nonprofits gives private schools the edge they need to innovate.

Raiser’s Edge NXT™ Smart Cloud Fundraising and Relationship Management

Raiser’s Edge NXT is the first-of-its-kind cloud fundraising and relationship management solution that’s smart, all-inclusive, fully integrated, and built exactly the way private schools want it. Key features include:

Integrated solutions • Actionable analytics • Innovation and expertise • Secure and up-to-date

Financial Edge NXT™ Intuitive Cloud Accounting

Financial Edge NXT is accounting software built exactly the way K-12 private schools want it. Powerful reporting tools help your accounting department drive transparency, stewardship, and compliance while enabling your school to seamlessly manage transactions, eliminate manual processes, and more. Key features include:

Analyze with precision • Streamline workflow • Reduce overhead • Powerful real-time reporting
