# 7.27.0 New Features

<b>AddressFinder (NCOA): Process Acknowledgment</b> .....	<b>2</b>
<b>everdayhero Integration: Australia, New Zealand, and the United Kingdom</b> .....	<b>2</b>

This guide lists new features available in the *eTapestry* 7.27.0, released on November 13, 2016.

## AddressFinder (NCOA): Process Acknowledgment

You can now give permission to run your data through the AddressFinder (NCOA) service from *eTapestry*. Previously, in order to utilize the service, your organization would need to complete the Process Acknowledgment Form (PAF) and submit it to Blackbaud.

Email \*

Jane.Doe@blank.org

I acknowledge that Blackbaud processes my organization's data through the USPS NCOA<sup>Link</sup> Database. For more details, refer to [Knowledgebase](#). \*

Schedule

To give us permission to submit your data, from **Management**, click **AddressFinder (NCOA)**. Enter information about your service. For more information, see [Schedule and run the AddressFinder \(NCOA\) service](#). Before you schedule your service, select to acknowledge that Blackbaud processes your data through the AddressFinder (NCOA) service.

## everdayhero Integration: Australia, New Zealand, and the United Kingdom

*everydayhero* is a peer-to-peer online giving solution that allows your organization to build online fundraising campaigns as part of your existing websites or as a stand-alone fundraising site. With this release, the *everydayhero* integration with *eTapestry* is now available to organizations in Australia, New Zealand, and the United Kingdom.

**Show Me:** [Watch a video](#) about the **everydayhero** integration with **eTapestry** to learn more

With the **everydayhero** integration with **eTapestry**, you can import constituent and gift information from **everydayhero** to update your database. Constituent records are updated with the information that comes from **everydayhero**, and new accounts are created if necessary. When you import gifts from **everydayhero**, you can create queries and reports of the information imported.

For information on how to set up your integration, see the [everydayhero Integration guide](#) for your region.
