

eTapestry New Features

Accept Direct Debits (ACH/EFT)	1
Buckaroo Payment Processor (Netherlands Only)	1

This guide lists new features available in the *eTapestry* 7.13.2 patch, released on January 25, 2015.

Accept Direct Debits (ACH/EFT)

When you use Blackbaud Merchant Services (BBMS), you can now accept direct debits from donors who provide bank routing information by selecting the new **Supports EFT** checkbox when you link your BBMS account to your *eTapestry* database. Donors can make recurring or one-time gifts. For information about how to enable this feature, refer to [online help](#).

Note: When you use BBMS, direct debits do not process in real time. These transactions are processed in bulk one time each day for seven days. When transactions do not process successfully within seven days, *eTapestry* automatically generates a gift reversal.

Buckaroo Payment Processor (Netherlands Only)

You can now select Buckaroo as your payment processor for Cart/eStore. From the Cart settings page, select **Buckaroo** under **Step 8 Other Options**. When website visitors submit payments through the Buckaroo payment processor, they are redirected to the Buckaroo site. After the transaction completes in Buckaroo, the website visitor is then returned to your Cart page.
